RATES

NOTICE OF APPLICATION

Natural Resource Gas Limited ("NRG") has filed with the Ontario Energy Board an Application dated August 21, 1995, under section 19 of the *Ontario Energy Board Act*, R.S.O. 1990, c. O.13. NRG requests approval of new rates and other charges for the sale, distribution and transmission of gas for a two year period, commencing October 1, 1995, and October 1, 1996. Any customer of NRG may be affected by the Board's decision regarding the Application.

NRG proposes to recover a greater share of its costs from customer classes that NRG considers are currently under-contributing. For example, the impact on a typical residential customer using gas for space and water heating would be a total increase of 2.5 percent in the 1996 Fiscal Year and 2.4 percent in the 1997 Fiscal Year.

This notice does not constitute service but is published as a matter of record only.

ENVIRONMENTAL ASSESSMENT ACT

SECTION 14

NOTICE OF APPROVAL TO PROCEED WITH THE UNDERTAKING

RE: An Environmental Assessment for the GO Train Service Expansion Program: Oshawa West to Oshawa East

Proponent: Go Transit

EA File No.: GT-AA-02

TAKE NOTICE that the period for requiring a hearing, provided for in the *Notice of Acceptance of the Environmental Assessment* for the undertaking, expired on April 20, 1995. I have received no notices requiring a hearing by the Environmental Assessment Board with respect to approval to proceed with the undertaking.

Having considered the purpose of the Act, the Environmental Assessment of the undertaking as accepted and the submissions received, I hereby give approval to proceed with the undertaking subject to the terms and conditions of approval as provided in the attachment.

REASONS:

My reasons for giving approval are:

1. On the basis of the proponent's Environmental Assessment and the Review, the proponent's conclusion that, on balance, the advantages of this undertaking outweigh its disadvantages appears to be valid.

2. No other more beneficial alternative method of implementing the undertaking was identified.

3. On the basis of the proponent's Environmental Assessment, the review and the conditions of approval, the construction, operation and maintenance of the undertaking will be consistent with the purpose of the Act (section 2).

Dated at Toronto, this 28th day of August, 1995.

Minister of Environment and Energy

Approved by O.C. No. 2241/95

ATTACHMENT

Terms and Conditions of Approval
GO Train Service Expansion Program:
Oshawa West to Oshawa East

Except as otherwise provided by these conditions, the undertaking shall be carried out in accordance with the provisions of the "Go Train Service Expansion Program: Oshawa West to Oshawa East" Environmental Assessment (EA).

NOISE AND VIBRATION

GO Transit shall prepare a Noise Assessment Report to analyze the noise impacts of the undertaking. This report shall be submitted to the Director of the Approvals Branch, Ministry of Environment and Energy (MOEE), for verification that it is consistent with the most current version of the "MOEE/GO Transit Protocol for Noise and Vibration Assessment", which is available at the time of commencement of the noise assessment. The most current version of the Protocol at the time of this Notice of Approval is Draft #8, dated December, 1994.

The Noise Assessment Report will contain the following information:

i) an examination of the noise and vibration impacts that could arise from the implementation of the project; and

ii) the identification, assessment and feasibility of measures to mitigate noise and vibration impacts.

GO Transit shall implement the feasible mitigation measures identified in the Noise Assessment Report in accordance with the criteria and procedures of the Protocol.

The Noise Assessment Report prepared in accordance with the above shall be submitted to the director of the MOEE Approvals Branch a minimum of 90 days prior to the beginning of construction of the undertaking.

WASTE

For lands which are not on Federal Property, GO Transit will:

i) follow the site assessment process as outlined in the Provincial Guidelines (Proposed Guidelines for the Clean-up of Contami-

nated Sites in Ontario, MOEE, July 1994) and, where appropriate, will ensure that soil testing is undertaken to determine if contaminated soils are on site; and

ii) in the event that wastes are encountered during construction, GO Transit will prepare a remedial action plan. This plan is to be submitted for the review and approval of the Director of Central Region, prior to the proponent continuing with any construction in the contaminated area.

HYDRO

Should the expansion of GO Train service to Oshawa East result in any reduced clearances, either horizontal or vertical, that would affect the safe operation and maintenance of Ontario Hydro's facilities, then GO Transit will be required to bear the costs of relocating those facilities.

GO/VIA STATION

GO Transit shall implement the undertaking in such a manner as to ensure parking for VIA passengers and employees is maintained and VIA operations are not impacted.

FLOODPLAIN

In order to accommodate a parking facility which will provide dry vehicular access during flood events, GO Transit will undertake all floodplain mapping and flood reduction works necessary to ensure that the Harmony Road/Bloor Street Station parking facility meets Conservation Authority Regulations for parking lots.

Best Management Practises (BMPs) shall be employed in the construction of the Stevenson Road and Bloor Street stations to ensure that there is no negative impact on water quality in the receiving watercourses or the Oshawa Second Marsh.

CREEK CHANNELIZATION OR REALIGNMENT

Any required creek channelization or realignment, such as that which may be required for the construction of the Stevenson Road station, shall incorporate principles of natural channel design and habitat rehabilitation.

DETAILED DESIGN

GO Transit shall consult with the Central Lake Ontario Conservation Authority, VIA Rail, Ministry of Environment and Energy, Ministry of Natural Resources, Ministry of Transportation, Municipality of Clarington and Valiant Property Management during the Detailed Design stage. GO Transit shall provide these interested parties with the opportunity to review and comment on the Detailed Design, as outlined below.

- GO Transit shall provide the Central Lake Ontario Conservation Authority (CLOCA) with the opportunity to review the Detailed Design and make recommendations regarding stream crossings, sediment control, and minimization of tree removal.
- VIA Rail shall be consulted by GO Transit in the review of the final design and construction at the existing Oshawa GO/VIA Station.
- GO Transit will prepare a Stormwater Management Plan. The plan will include an assessment of several alternative solutions for managing the stormwater on i) the Stevenson Road Station Site; and ii) the Bloor Street East Station Site, and identify the preferred solution for stormwater control and quality control. GO Transit will focus primarily on methods of reducing or preventing negative impacts in determining the preferred solution for managing stormwater. The Stormwater Management Plan, and the Detailed Design, will be submitted to the Director of Central Region, Ministry of Environment and Energy, for comment, a minimum of 90 days prior to construction of the undertaking.
- GO Transit shall provide the opportunity for the Ministry of Natural Resources to review:

i) design and plans for all watercourse crossings, including structure design and detailed plans of any proposed channel realignment ;

ii) stormwater management plans and details of the best management practice selection process for the rail and layover stations; and

iii) full drainage plans on the extension of the culvert situated in the layover site, and plans for fill placement and channel alignment in this area.

- The Ministry of Transportation will be contacted during the Detailed Design process regarding issues pertaining to their mandate, for example, the Highway 401 crossing.
- GO Transit will consult with the Municipality of Clarington for the preparation of Design and Construction Reports relating to the layover site.
- The Detailed Design of the Stevenson Road Station, parking lot, driveways and all other appurtenances will examine mitigation techniques which will reduce or eliminate environmental impacts on the property and apartment buildings located at 300 and 400 Grenfell Avenue, Oshawa.

ONTARIO REGULATION 511/95
made under the
ENVIRONMENTAL ASSESSMENT ACT

Approved: November 29, 1995
Filed: December 13, 1995

EXEMPTION—WASTE MANAGEMENT PLANNING

A number of private companies and municipalities in the Province of Ontario, including groups of municipalities who have together sponsored waste management studies, have recently gone through or are going through planning processes respecting waste management and have identified or are about to identify undertakings for the disposal of municipal waste as a result of such planning processes.

These planning processes were carried on entirely or substantially during a period of time when the establishment of a new municipal waste incinerator site in Ontario was not permitted. New municipal waste incinerator sites were not permitted by Ontario Regulation 555/92, which added section 12.1 to Regulation 347 (Waste Management). They remain not permitted until the said section 12.1 is revoked.

Accordingly, these planning processes did not seriously address the alternative of incineration of municipal waste. Environmental assessments resulting from these planning processes will not address incineration and may fail to comply with subsection 5 (3) of the *Environmental Assessment Act* for that reason. It appears desirable that these undertakings be exempted pursuant to section 29 of the Act from the provisions of subsection 5 (3) of the Act, to the extent that these provisions may require the incineration of municipal waste to be addressed as an alternative to an undertaking or an alternative method of carrying out an undertaking.

I am advised that if these undertakings are subject to all of the requirements of subsection 5 (3) of the Act, the following injury, damage or interference with the persons or property indicated will occur:

A. Private companies and municipalities, including groups of municipalities who have together sponsored waste management studies, will be delayed and put to considerable expense if they must repeat or amend their planning processes so as to address incineration;

B. Persons resident in municipalities which may have their waste disposal capacity supplied by a private company or municipalities which are undertaking a waste management planning process may be inconvenienced by the lack of disposal capacity available to the municipalities as a result of the delays mentioned.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that any waste disposal undertaking by any private company or municipality, including a group of municipalities who have together sponsored a waste management study, is exempt from the provisions of subsection 5 (3) of the Act, to the extent that such provisions may require the incineration of municipal waste to be

addressed as an alternative to an undertaking or an alternative method of carrying out an undertaking, for the following reason:

A. To avoid the above-noted injury, damage or interference.

This exemption is subject to the following term and condition:

1. This exemption applies only to private companies and municipalities, including groups of municipalities who have together sponsored waste management studies, who within one year of the date of approval of this exemption have substantially completed their analysis of "alternatives to" (as defined in subsection 5 (3) of the Act) and have provided notice in writing of substantial completion of the analysis to the Director of the Environmental Assessment Branch.

ONTARIO REGULATION 520/95
made under the
ENVIRONMENTAL ASSESSMENT ACT

Approved: November 29, 1995
Filed: December 14, 1995

EXEMPTION—MINISTRY OF NATURAL RESOURCES, MINISTRY OF HEALTH AND MINISTRY OF AGRICULTURE, FOOD AND RURAL AFFAIRS

Having received a request from the Minister of Natural Resources, the Minister of Health and the Minister of Agriculture, Food and Rural Affairs that an undertaking, namely:

> The carrying out of the Wildlife Rabies Control Program to control and seek to eliminate rabies from wildlife in Ontario, through the vaccination of wildlife species that spread the disease;

be exempt from the application of the Act pursuant to section 29; and, having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with persons or property will occur:

A. The Crown and the public will be interfered with and damaged by the expense required to prepare an environmental assessment for activities that will not have significant adverse environmental effects;

B. The Crown and the public will be interfered with by the delay in carrying out an activity which is principally a public health and safety and environmental protection measure;

C. The Crown and the public will be damaged by the loss of anticipated benefits associated with undertaking this program;

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking be exempt from the application of the Act for the following reasons:

A. Five years spent developing the Wildlife Rabies Control Program have shown that the significant environmental effects are positive, i.e., the program is successful.

B. Prior to commencing a wildlife rabies control activity, the affected public will be notified;

C. The Wildlife Rabies Control Program is important to the continued health and safety of Ontario's natural, social and economic environment;

D. Vaccines used must be licensed by Agriculture and Agri-food Canada.

E. The objectives of the wildlife rabies control program are consistent with the protection, conservation and wise management of Ontario's environment.

This exemption is subject to the following terms and conditions:

1. At least 30 days prior to commencing a wildlife rabies control activity, either through aerial baiting, hand baiting or trapping, vaccinating and releasing, the public and the Director of the appropriate regional office of the Ministry of Environment and Energy shall be notified of the project by the Ministry of Natural Resources (MNR).

2. The effects and effectiveness of the rabies vaccination program will be monitored by MNR. A summary of the monitoring findings and the activities carried out under the Wildlife Rabies Control Program will be submitted by MNR to the Director of the Environmental Assessment Branch of the Ministry of Environment and Energy on June 30 of each year of this approval. Each summary will be based on data from the previous year. Copies of this summary shall be available for examination by the public, upon request, from the MNR, the Ministry of Health and the Ministry of Agriculture, Food and Rural Affairs.

3. Where any activity which is subject to this order is carried out as or is part of another undertaking which is subject to an

exemption order or approval under the *Environmental Assessment Act*, the activity exempt under this order shall be carried out in accordance with any terms or conditions in the other exemption order or approval as well as the terms or conditions in this order. In the event of a conflict between any term or condition in this exemption order and any terms or condition in another exemption order or approval, the term or condition of this exemption order shall prevail to the extent of the conflict.

4. This order expires 10 years from the date of the approval of this exemption order or on such later date as is determined by the Minister of Environment and Energy and published in *The Ontario Gazette*.

Minister of Environment and Energy

ONTARIO REGULATION 521/95
made under the
ENVIRONMENTAL PROTECTION ACT

Made: December 13, 1995
Filed: December 15, 1995

Amending O. Reg. 760/93
(Effluent Monitoring and Effluent Limits—
Pulp and Paper Sector)

Note: Ontario Regulation 760/93 has not previously been amended.

1. Subsection 3 (2) of Ontario Regulation 760/93 is amended by inserting "sanitary" after "municipal" in the second line.

2. Section 4 of the Regulation is revoked and the following substituted:

REQUIREMENTS UNDER APPROVALS, ORDERS, ETC.

4. For greater certainty, subject to subsection 186 (4) of the Act, the requirements of this Regulation are in addition to and independent of requirements in an approval, order, direction or other instrument issued under any Act.

3. Section 6 of the Regulation is revoked and the following substituted:

BY-PASSES

6. Beginning on January 1, 1996, a discharger shall not permit effluent that would ordinarily flow past a sampling point established under this Regulation to be discharged from the discharger's plant without flowing past that sampling point, regardless of whether it would be convenient to do so because of a maintenance operation, a breakdown in equipment or any scheduled or unscheduled event.

4. Subsection 7 (1) of the Regulation is amended by striking out "July, 1993" in the last line and substituting "August, 1994".

5. Section 8 of the Regulation is amended by adding the following subsections:

(1.1) Each discharger for the Thunder Bay Packaging Inc. plant shall, by December 20, 1995, establish a sampling point on each process effluent and cooling water effluent stream at the discharger's plant, as necessary so that the plant loadings calculated under sections 12 and 13 for each limited parameter and assessment parameter and the concentrations determined for each specific parameter accurately reflect the level of discharge of each such parameter from the plant.

(1.2) A discharger referred to in subsection (1.1) need not comply with subsection (1).

. . . . . .

(6) Despite subsection (1), a discharger need not establish a sampling point on a by-pass.

6. Section 9 of the Regulation is amended by adding the following subsections:

(1.1) By March 31, 1996, each discharger for the Thunder Bay Packaging Inc. plant shall submit to the Director a list and plot plan showing the sampling points established under this Regulation at the discharger's plant as of December 20, 1995.

(1.2) A discharger referred to in subsection (1.1) need not comply with subsection (1).

7. Subsection 11 (2) of the Regulation is amended by striking out "July, 1993" in the fifth line and substituting "August, 1994".

8. Subsection 14 (7) of the Regulation is amended by striking out "July, 1993" in the last line and substituting "August, 1994".

9. Section 15 of the Regulation is amended by adding the following subsections:

(1.1) Beginning on January 31, 1997, each discharger for the Thunder Bay Packaging Inc. plant may annually calculate a revised daily plant loading limit and a revised monthly average plant loading limit for each limited parameter.

(1.2) Subsection (1) does not apply to a discharger referred to in subsection (1.1).

10. Section 20 of the Regulation is amended by adding the following subsections:

(4) Each discharger for the Kimberly-Clark Canada Inc., Huntsville plant shall, twice during all or part of each six-month period beginning on October 15, pick up a set of samples collected at each process effluent sampling point at the discharger's plant, and shall analyze each set of samples for each specific parameter.

(5) Despite subsection (4), if process effluent is discharged continuously from the plant for a period lasting three months or more during any six-month period beginning on April 15, subsection (4) ceases to apply at the end of the three-month period and each discharger for the plant shall instead, on one day in each quarter, pick up a set of samples collected at each process effluent sampling point at the plant and shall analyze each set of samples for each specific parameter.

(6) If, during any six-month period beginning on April 15 during which subsection (5) applies, no process effluent is discharged from the plant for a period lasting three months or more, subsection (5) ceases to apply at the end of the three-month period and each discharger for the plant shall instead comply with subsection (4), until conditions at the plant make subsection (5) apply again.

(7) Each set of samples picked up at the discharger's plant under subsection (4) or (5) shall be picked up on a day on which samples are picked up at the plant under subsection 19 (1).

(8) There shall be an interval of at least 45 days between successive pick-up days at the plant under subsection (4) or (5).

(9) All samples picked up under subsection (4) or (5) in a quarter shall be picked up on the same day in the quarter.

11. Subsection 21 (2) of the Regulation is amended by striking out "July, 1993" in the last line and substituting "August, 1994".

12. The Regulation is amended by adding the following section:

MONITORING—COOLING WATER EFFLUENT—
PH AND SPECIFIC CONDUCTANCE MEASUREMENT

22.1 (1) Each discharger shall, on one day in each week, on the day on which samples are picked up at the plant under section 26, collect a grab sample from each cooling water effluent sampling point at the discharger's plant and shall analyze each sample for the parameter pH and the parameter specific conductance.

(2) Within the 24-hour period beginning with the collection of the first grab sample at the plant under subsection (1) in each week, the discharger shall collect two more grab samples from each cooling water effluent sampling point at the discharger's plant and shall analyze each sample for the parameter pH and the parameter specific conductance.

(3) There shall be an interval of at least four hours between each of the three collections at a sampling point under subsections (1) and (2) in each 24-hour period.

(4) Each grab sample collected under subsections (1) and (2) shall be picked up within 24 hours of when it was collected.

(5) Instead of complying with subsections (1) to (4) with respect to a stream, a discharger may use an on-line analyzer at the sampling point on the stream and analyze the effluent at the sampling point for the parameter pH and the parameter specific conductance on one day in each week, on the day on which samples are picked up at the plant under section 26, and two more times in each 24-hour period beginning with the first analysis at the plant under this subsection for the week.

(6) There shall be an interval of at least four hours between each of the three analyses at a sampling point under subsection (5) in each 24-hour period.

13. (1) Subsection 29 (1) of the Regulation is amended by striking out "August, 1993" in the fourth and fifth lines and substituting "August, 1994".

(2) Clause 29 (2) (a) of the Regulation is amended by striking out "August, 1993" in the third and fourth lines and substituting "August, 1994".

(3) Subsection 29 (3) of the Regulation is amended by striking out "November 27, 1995" and substituting "July 3, 1996".

(4) Section 29 of the Regulation is amended by adding the following subsections:

(4.1) Subsections 29 (2) to (4) do not apply to a discharger for the Thunder Bay Packaging Inc. plant.

(4.2) A discharger for the Thunder Bay Packaging Inc. plant need not comply with subsection (1) in respect of the discharger's plant if,

(a) the plant meets the exemption criteria set out in the Ministry of Environment and Energy publication entitled "Protocol for Conducting a Storm Water Control Study", dated August, 1994; and

(b) the discharger notifies the Director in writing, by December 15, 1996, that the plant meets the exemption criteria referred to in clause (a).

(4.3) Subject to subsection (4.4), each discharger at the Thunder Bay Packaging Inc. plant shall complete the storm water control study in respect of the discharger's plant by December 15, 1997.

(4.4) A discharger for the Thunder Bay Packaging Inc. plant may postpone completion of the storm water control study in respect of the discharger's plant until January 1, 1999 if,

(a) in order to meet the requirements of Part IV, the discharger plans to make process changes, install wastewater treatment facilities, implement management practices or make any other changes at the plant that would likely alter the quantity or quality of storm water discharged from the plant; and

(b) the discharger notifies the Director in writing, by December 15, 1997, of the plans referred to in clause (a).

14. The Regulation is amended by adding the following Part:

PART VIII.1
DELAYED APPLICATION OF PARTS IV, V AND VI

38.1 (1) A discharger for the Thunder Bay Packaging Inc. plant need not comply with any requirement of Part IV until January 31, 1997.

ONTARIO REGULATION 522/95
made under the
ENVIRONMENTAL PROTECTION ACT

Made: December 13, 1995
Filed: December 15, 1995

Amending O. Reg. 63/95
(Effluent Monitoring and Effluent Limits—
Organic Chemical Manufacturing Sector)

Note: Ontario Regulation 63/95 has not previously been amended.

1. Section 32 of Ontario Regulation 63/95 is revoked and the following substituted:

MONITORING—COOLING WATER EFFLUENT —WEEKLY ASSESSMENT

32. (1) Each discharger shall, on one day in each week, pick up a set of samples collected at each cooling water effluent sampling point at the plant and shall analyze each set of samples for the parameters listed in Column 1 of Schedule 6 for the discharger's plant.

(2) All samples picked up at a plant under subsection (1) shall be picked up,

(a) on the day on which samples are picked up at the plant under section 20;

(b) in a week in which no samples are picked up at the plant under section 20, on a day on which samples are picked up at the plant under section 22; or

(c) in a week in which no samples are picked up at the plant under section 20 or 22, on any day in the week.

(3) There shall be an interval of at least four days between successive pick-up days at the plant under clause (2) (c).

(4) All samples picked up under clause (2) (c) in a week shall be picked up on the same day in the week.

2. (1) The heading immediately preceding section 33 of the Regulation is amended by striking out "AND COOLING WATER EFFLUENT".

(2) Subsection 33 (7) of the Regulation is revoked.

3. The Regulation is amended by adding the following section:

MONITORING—COOLING WATER EFFLUENT —
pH AND SPECIFIC CONDUCTANCE MEASUREMENT

33.1 (1) Each discharger shall, on one day in each week, on the day on which samples are picked up at the plant under section 32, during the time period applicable to the plant under subsection 18 (3) or (4), collect a grab sample from each cooling water effluent sampling point at the discharger's plant and shall analyze each sample for the parameter pH and the parameter specific conductance.

(2) Within the 24-hour period beginning with the collection of the first grab sample at the plant under subsection (1) in each week, the discharger shall collect two more grab samples from each cooling water effluent sampling point at the discharger's plant and shall analyze each sample for the parameter pH and the parameter specific conductance.

(3) There shall be an interval of at least four hours between each of the three collections at a sampling point under subsections (1) and (2) in each 24-hour period.

(4) Each grab sample collected under subsections (1) and (2) shall be picked up within 24 hours of when it was collected.

(5) Instead of complying with subsections (1) to (4) with respect to a stream, a discharger may use an on-line analyzer at the sampling point on the stream and analyze the effluent at the sampling point for the parameter pH and the parameter specific conductance on one day in each week, on the day on which samples are picked up at the plant under section 32, during the time period applicable to the plant under subsection 18 (3) or (4), and two more times in each 24-hour period beginning with the first analysis at the plant under this subsection for the week.

(6) There shall be an interval of at least four hours between each of the three analyses at a sampling point under subsection (5) in each 24-hour period.

4. Section 36 of the Regulation is amended by adding the following subsections:

(1.1) Despite subsection (1), the requirements in respect of parameters for analysis required for process effluent and cooling water effluent, set out at page 5 of the Ministry of Environment and Energy publication entitled "Protocol for Conducting a Storm Water Control Study", dated August, 1994 do not apply in relation to the following plants:

1. Novacor Chemicals Ltd., Petrochemicals Division.

2. Oxychem Durez Canada.

3. Rohm and Haas Canada Inc. (West Hill).

(1.2) For the purposes of subsection (1), each discharger for Novacor Chemicals Ltd., Petrochemicals Division, Oxychem Durez Canada and Rohm and Haas Canada Inc. (West Hill) shall complete a storm water control study using the parameters set out in Column 1 of Schedule 10 for the discharger's plant.

5. (1) Subsection 37 (1) of the Regulation is amended by striking out "and 33" in the third line and substituting "33 and 33.1".

(2) Subsection 37 (8) of the Regulation is amended by striking out "Schedule 10" in the third line and substituting "Schedule 11".

(3) Subsection 37 (9) of the Regulation is amended by striking out "Schedule 10" in the third line and substituting "Schedule 11".

6. Clause 38 (1) (c) of the Regulation is amended by striking out "to 33" in the second line and substituting "to 33.1".

7. Subsection 39 (4) of the Regulation is amended by striking out "Schedule 10" in the third line and substituting "Schedule 11".

8. (1) Section 41 of the Regulation is amended by adding the following subsection:

(6.1) Each discharger shall, for each process effluent batch sampling point established under this Regulation at the discharger's plant, report the number of times in each month in the quarter on which effluent flowed past the sampling point.

(2) Subsection 41 (8) of the Regulation is revoked and the following substituted:

(8) Each discharger shall report, for each month in the quarter, the highest and lowest pH results and the highest and lowest specific conductance results obtained under,

(a) section 33 for each merged effluent monitoring stream at the discharger's plant; and

(b) section 33.1 for each cooling water effluent monitoring stream at the discharger's plant.

(9) Each discharger shall report, for each quarter, the results obtained under subsection 21 (1) in respect of each specific parameter for each process effluent sampling point at the discharger's plant.

9. Schedules 1 to 10 of the Regulation are revoked and the following substituted:

(4) All samples collected and picked up at a plant under subsection (3) shall be collected and picked up,

(a) on a day on which samples are picked up at the plant under subsection 20 (1);

(b) in a month in which no samples are picked up at the plant under subsection 20 (1), on a day on which samples are picked up at the plant under section 21; or

(c) in a month in which no samples are picked up at the plant under subsection 20 (1) or 21 (1), on any day in the month.

(2) Subsection 26 (9) of the Regulation is revoked and the following substituted:

(9) If no samples are being picked up at a plant under subsection (3) during a quarter, samples picked up at the plant during the quarter under subsection (7) shall be picked up,

(a) on a day on which samples are picked up at the plant under subsection 20 (1); or

(b) in a quarter in which no samples are picked up at the plant under subsection 20 (1), on a day on which samples are picked up at the plant under section 21.

4. Subsection 31 (3) of the Regulation is revoked and the following substituted:

(3) On one day in each semi-annual period, each discharger shall collect and immediately pick up a grab sample from each sampling point listed in Schedule 9 for the discharger's plant, and shall perform a seven-day fathead minnow growth inhibition test and a seven-day *Ceriodaphnia dubia* reproduction inhibition and survivability test on each sample.

(3.1) All samples collected and picked up at a plant under subsection (3) shall be collected and picked up,

(a) on a day on which samples are picked up at the plant under section 20;

(b) in a semi-annual period in which no samples are picked up at the plant under section 20, on a day on which samples are picked up at the plant under section 22; or

(c) in a semi-annual period in which no samples are picked up at the plant under section 20 or 22, on a day on which samples are picked up at the plant under section 21.

5. Section 32 of the Regulation is revoked and the following substituted:

MONITORING—COOLING WATER EFFLUENT—WEEKLY ASSESSMENT

32. (1) Each discharger shall, one day in each week, pick up a set of samples collected at each cooling water effluent sampling point at the plant and shall analyze each set of samples for the parameters listed in Column 1 of Schedule 6 for the discharger's plant.

(2) All samples picked up at a plant under subsection (1) shall be picked up,

(a) on the day on which samples are picked up at the plant under section 20;

(b) in a week in which no samples are picked up at the plant under section 20, on a day on which samples are picked up at the plant under section 22; or

(c) in a week in which no samples are picked up at the plant under section 20 or 22, on any day in the week.

(3) There shall be an interval of at least four days between successive pick-up days at the plant under clause (2) (c).

(4) All samples picked up under clause (2) (c) in a week shall be picked up on the same day in the week.

6. (1) The heading immediately preceding section 33 of the Regulation is amended by striking out "AND COOLING WATER EFFLUENT".

(2) Subsection 33 (7) of the Regulation is revoked.

7. The Regulation is amended by adding the following section:

MONITORING—COOLING WATER EFFLUENT—
pH AND SPECIFIC CONDUCTANCE MEASUREMENT

33.1 (1) Each discharger shall, on one day in each week, on the day on which samples are picked up at the plant under section 32, collect a grab sample from each cooling water effluent sampling point at the discharger's plant and shall analyze each sample for the parameter pH and the parameter specific conductance.

(2) Within the 24-hour period beginning with the collection of the first grab sample at the plant under subsection (1) in each week, the discharger shall collect two more grab samples from each cooling water effluent sampling point at the discharger's plant and shall analyze each sample for the parameter pH and the parameter specific conductance.

(3) There shall be an interval of at least four hours between each of the three collections at a sampling point under subsections (1) and (2) in each 24-hour period.

(4) Each grab sample collected under subsections (1) and (2) shall be picked up within 24 hours of when it was collected.

(5) Instead of complying with subsections (1) to (4) with respect to a stream, a discharger may use an on-line analyzer at the sampling point on the stream and analyze the effluent at the sampling point for the parameter pH and the parameter specific conductance on one day in each week, on the day on which samples are picked up at the plant under section 32, during the time period applicable to the plant under subsection 18 (3) or (4), and two more times in each 24-hour period beginning with the first analysis at the plant under this subsection for the week.

(6) There shall be an interval of at least four hours between each of the three analyses at a sampling point under subsection (5) in each 24-hour period.

8. Section 36 of the Regulation is amended by adding the following subsections:

(1.1) Despite subsection (1), the requirements in respect of parameters for analysis required for process effluent and cooling water effluent, set out at page 5 of the Ministry of Environment and Energy publication entitled "Protocol for Conducting a Storm Water Control Study", dated August, 1994 do not apply in relation to the following plants:

1. Columbian Chemicals Canada Ltd.

2. Partek Insulations Ltd.

(1.2) For the purposes of subsection (1), the discharger shall complete a storm water control study using the parameters set out in Column 1 of Schedule 10 for the discharger's plant.
